

Mohamed Aziz Grami

Full-Stack Software Engineer

Email: gramiaziz9@gmail.com Phone: +216 29 843 730 Location: Tunis, Tunisia
LinkedIn Portfolio Github

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with strong backend expertise in Java (Spring Boot), REST API design, and SQL-based systems. Experienced in building scalable applications with real business impact. Strong interest in scalable backend systems, process optimization, and AI-based solutions.

PROFESSIONAL EXPERIENCE

Full-Stack Developer – Internship

INETUM Tunisia — Tunis, Tunisia

February 2025 – July 2025

- Owned end-to-end development of an incident management platform integrated with Microsoft Dynamics CRM, from requirements analysis and architecture design to implementation and delivery.
- Designed system architecture and data model; implemented automated workflows, SLA alerts, and multi-level escalation processes.
- Developed Power BI dashboards for real-time KPI monitoring and implemented ETL logic for CRM data analysis.
- Reduced incident resolution time by 30% through workflow automation and KPI-driven monitoring.
- **Technologies:** Next.js, .NET, Microsoft Dynamics CRM, Power BI

Full-Stack Developer & Tester – Internship

Ukla Software — Tunis, Tunisia

July 2024 – August 2024

- Developed backend and frontend features enabling users to create and manage detailed content creator recipes within a production application.
- Improved backend code quality and deployment stability by implementing automated tests and integrating them into the CI pipeline.
- Achieved 85% unit test coverage on backend services using JUnit and Mockito, leading to earlier detection and resolution of critical bugs.
- **Technologies:** Spring Boot, Angular, NgRx, JUnit, Mockito, Jira

Full-Stack Developer – Internship

ESPRIT — Tunis, Tunisia

July 2023 – August 2023

- Designed and implemented a web platform for managing internship and job offers, including offer publication, application tracking, and user role management.
- Developed reusable frontend components and REST APIs, contributing to a responsive and maintainable application.
- **Technologies:** Spring Boot, Angular, NgRx, Bootstrap, Angular Material

PROJECTS

Freelance Project: E-commerce Platform Dasy — Full-Stack Developer

January 2026 – February 2026

- Designed and developed a custom e-commerce platform for a clothing brand, including product management and online sales.
- Built RESTful APIs using Spring Boot, implementing data persistence with JPA (Hibernate), and optimized SQL queries on PostgreSQL.
- Implemented authentication and authorization using JWT-based security.
- Developed a responsive front end using Next.js and integrated it with back end services.
- **Technologies:** Spring Boot, JPA (Hibernate), REST APIs, JWT, Next.js, PostgreSQL

Academic Project: ERP Platform CoConsult — Full-Stack Developer

January 2024 - June 2024

- Designed and developed a custom ERP system tailored for SMEs, covering core business workflows and user management.
- Designed and optimized SQL queries to ensure efficient data access and performance.
- Implemented a complete DevOps pipeline including CI/CD automation, code quality monitoring (SonarQube), containerization (Docker), and system monitoring (Grafana).
- **Technologies:** Angular, NgRx, Spring Boot, JPA (Hibernate), REST APIs, Jenkins

Freelance Project: Official Website for F2K — Frontend Developer

July 2024 – September 2024

- Developed a responsive corporate website using Angular, focusing on performance, SEO optimization, and user experience.
- Designed reusable UI components and ensured cross-browser compatibility and mobile responsiveness.
- Optimized page load performance and improved SEO through structured content and best practices.
- **Technologies:** Angular, HTML5, CSS3, JavaScript

Freelance Project: E-commerce Platform Tsukyomei — Web Developer

May 2024 – June 2024

- Developed a dynamic e-commerce platform for anime-inspired clothing, including product catalog, user interactions, and order management features.
- Designed and implemented backend logic using PHP with a MySQL database for data storage and retrieval.
- Implemented core e-commerce functionalities such as product listing, cart management, and order processing.
- **Technologies:** PHP, MySQL, HTML5, CSS3, JavaScript

TECHNICAL SKILLS

Languages & Frameworks: Java, Spring Boot, Angular, .NET, Next.js, React, Symfony, Python, PHP

Databases: PostgreSQL, SQL, Supabase

DevOps & Tools: Docker, Jenkins, CI/CD, Git, GitHub, GitLab, SonarQube, Jira, Power BI

Languages: Arabic (Native), French (B2), English (B2), Spanish (B1)

CERTIFICATIONS

Machine Learning Specialization

DeepLearning.AI (Coursera)

- Supervised Machine Learning: Regression and Classification
- Advanced Learning Algorithms
- Unsupervised Learning, Recommenders, Reinforcement Learning

EDUCATION

Bachelor of Engineering in Software Engineering

Private Higher School of Engineering and Technology (ESPRIT)

2022 – 2025

Preparatory Classes in Physics and Technology

Preparatory Institute for Engineering Studies of El Manar (IPEIEM)

2020 – 2022

Baccalaureate in Technical Sciences (Honors: 16.95/20)

Aïn Mazouz High School, Tabarka

2016 – 2020

EXTRACURRICULAR ACTIVITIES

ACM Club — ESPRIT

- Active member of the ACM programming club, specializing in problem solving and algorithmic challenges.

Competitions and Hackathons

- Participated in several programming competitions and hackathons, primarily using Java and Python.
